

How to Apply Sauna Cleaner

Can be used straight from the bottle for tough jobs or diluted up to 5 to 1 for basic upkeep

Simply wipe where the sweat is... Gentle on wood. Rejuvenates your sauna. **To be diluted up to 5 to 1 for basic upkeep.** Dampen a small towel with the solution and wipe where the sweat stains are. ****Do not use on heaters****

Many cleaning products contain bleach or ammonia which will dry and damage the wood in your sauna. Clearlight sauna cleaner uses natural oils to gently clean the wood without drying it out. This keeps your sauna looking new and avoids the splintering and cracking that can occur with other cleaning products.

In addition to keeping your sauna looking new, our sauna cleaner also has natural fragrance oils which deodorize while it cleans.

The effectiveness of Clearlight sauna cleaner is proven by the many customers we have that have relied on the product for decades. Sauna maintenance will only take a few minutes.

****PLEASE NOTE:** Spraying is not recommended as any spray that gets onto the heaters will cause heaters to erode and is not covered under warranty****.**

HANDLING AND STORAGE

- Handling – Avoid contact with eyes.
- Do not swallow.
- Do not eat while handling.
- Storage – Keep containers closed.
