HALO ONE Gen 1 Battery Replacement Instructions
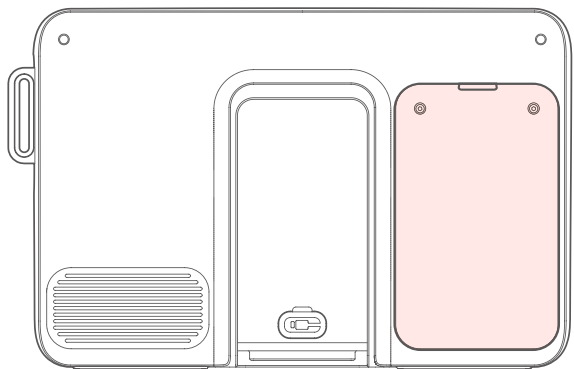

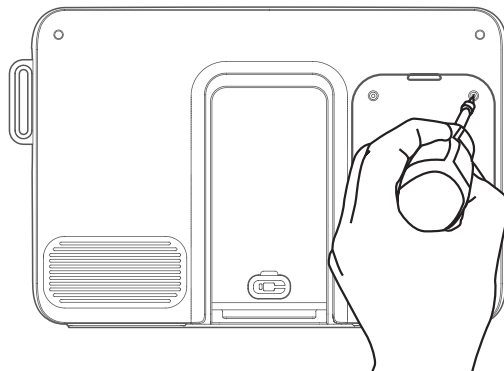

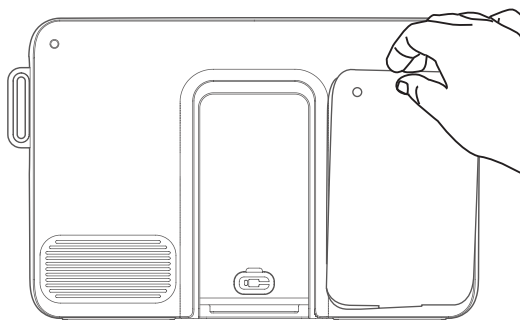

Clearlight®

**1** **Locate Battery Compartment** – On the back of the HALO ONE device.

**2** **Loosen Screws** – Use a screwdriver to loosen both screws on the battery cover.

3 **Remove Cover** – Lift off the cover once the screws are loosened.
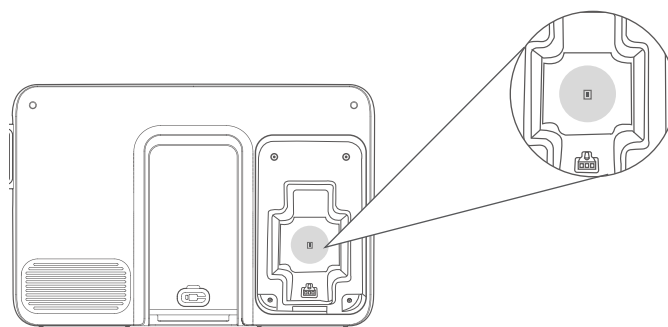

4 **Remove Battery** – Carefully pull out the battery. Adhesive may cause resistance.

**5** **Disconnect Battery** – Release the clip and unplug the battery.

6 **Apply Sticker** – Place the provided 40mm transparent sticker inside the battery box on the back cover over the sensor.

7   **Connect New Battery** – Attach the new battery connector until it clicks into place. Use needle-nose pliers if needed.
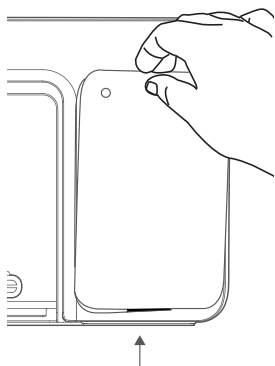

8   **Insert Battery** – Place the battery into the compartment.

9   **Replace Cover** – Insert the bottom part of the cover first, then close fully.

10   **Tighten Screws** – Secure the cover by tightening both screws.
